Experience

Think Together - Nonprofit

Systems Administrator - Full Time | Santa Ana, CA

March 2023 - June 2026

- Developed PowerShell scripts to automate Active Directory maintenance and Identity management. Reducing manual workload tenfold while also improving task execution
- Developed PowerShell scripts to analyze the changes from HR and payroll systems in order to identify and streamline reporting and identity management efforts
- Developed and maintained Python automations that consume APIs for ingesting Applicant Tracking System data and user forms to Enterprise Content Management Systems and ETL data warehousing projects saving 50 hours monthly of manual data entry work
- Implement workflows utilizing BitWarden secure send services in order to harden department wide security practices
- Elimination of repetitive tickets through workflow automations

Opentrons - Pandemic Response Lab

Junior Systems Administrator - Full Time | Irvine, CA

August 2021 - December 2022

- Oversee and manage lab space of ~120+ devices including laptops, desktops, tablets, and instruments, supporting ~40k COVID-19 specimens daily and about \$2 million in revenue weekly.
- Manage company-wide user access across multiple platforms in a timely manner for onboarding and offboarding purposes
- Educate end-users on various safety practices including hardware protection, data protection, authentication, etc.
- Migrated, rebuilt, and documented the environment to move into a new suite of software for our company, helping save the company about ~\$100,000 monthly from MSP costs.
- Develop and maintain Intune installation packages to increase productivity for workstation setup time tenfold
- Assist with asset management via Intune and Jamf implementation to unify and collect various workstation metrics to identify hardware failure
- Supply Network support responsibilities to empower the Irvine site including network maintenance, troubleshooting, supporting ISP upgrades, documentation, etc.

Taylored Fulfillment Services

IT Support Engineer - Full Time | Chino, CA

February 2019 - August 2021

- Oversee Warehouse Management System for eCommerce based shipping to target day-to-day bottlenecks to increase general workflow
- Develop internal program with Python to update shipping information and increase shipping productivity by ~500% and eliminate daily ticket request
- Develop 2-3 reports weekly per customer for internal and external use to better measure shipping and receiving metrics
- Managed documentation process for SOPs through bot implementation for a team of 10 members, resulting in increasing productivity and minimizing downtime by 2-3 hours per issue.
- Daily task of ticket elimination under ManageEngine
- Asset procurement for all IT hardware and supplies. Worked directly with accounting to document and organize all purchases
- Supply hardware support responsibilities such as printer and computer maintenance to minimize downtime.
- Supply network support responsibilities to enable packstation utility.

Education

California State Polytechnic University, Pomona

College of Business Administration | Computer Information Systems, B.S.

Graduated July 2018
